MSA maintained a healthy balance sheet during the fourth quarter and full year 2022, with solid free cash flow and ample liquidity. Net leverage was 1.2x adjusted EBITDA at December 31, 2022. On a pro forma basis for the closing of the legacy liability subsidiary divestiture on January 5, 2023, net leverage would have been 2.2x adjusted EBITDA.

"Our fourth quarter performance was a strong finish to the year with double-digit organic sales growth and 210 basis points of adjusted operating margin expansion. Strong volume growth, strategic pricing, favorable mix and cost discipline resulted in a robust incremental operating margin and solid cash flow generation. While we expect the operating environment to remain challenging as we progress through 2023, we remain focused on delivering full year growth in the mid-single digits, healthy incremental margins and robust cash flow conversion," said Lee McChesney, MSA Safety Senior Vice President and Chief Financial Officer.

Adjusted operating income (loss), adjusted operating margin, adjusted earnings before interest, taxes, depreciation and amortization (EBITDA) and adjusted EBITDA margin are the measures used by the chief operating decision maker to evaluate segment performance and allocate resources. As such, management believes that adjusted operating income (loss), adjusted operating margin, adjusted EBITDA and adjusted EBITDA margin are useful metrics for investors. Adjusted operating income (loss) is defined as operating income excluding restructuring charges, currency exchange gains / losses, product liability expense, and acquisition related costs, including acquisition related amortization, and adjusted operating margin is defined as adjusted operating income (loss) divided by segment sales to external customers. Adjusted EBITDA is defined as adjusted operating income (loss) plus depreciation and amortization and adjusted EBITDA margin is defined as adjusted EBITDA divided by segment sales to external customers. Adjusted operating income (loss), adjusted operating margin, adjusted EBITDA and adjusted EBITDA margin are not recognized terms under GAAP and therefore do not purport to be alternatives to operating income or operating margin as a measure of operating performance. The Company's definition of adjusted operating income (loss), adjusted operating margin, adjusted EBITDA and adjusted EBITDA margin may not be comparable to similarly titled measures of other companies. As such, management believes that it is appropriate to consider operating income determined on a GAAP basis in addition to these non-GAAP measures.

^(a) Acquisition related costs include advisory, legal, accounting, valuation, and other professional or consulting fees incurred during due diligence and integration. These costs are included in selling, general and administrative expense in the Consolidated Statements of Income. Acquisition related costs also include the acquisition related amortization, which is included in cost of products sold in the Consolidated Statements of Income.

Management believes that adjusted earnings and adjusted earnings per diluted share are useful measures for investors, as management uses these measures to internally assess the Company's performance and ongoing operating trends. There can be no assurances that additional special items will not occur in future periods, nor that MSA's definition of adjusted earnings is consistent with that of other companies. As such, management believes that it is appropriate to consider both net income determined on a GAAP basis as well as adjusted earnings.

Management believes that free cash flow is a meaningful measure for investors. Management reviews cash from operations after deducting capital expenditures because these expenditures are necessary to promote growth of MSA's business and are likely to produce cash from operations in future periods. It is important to note that free cash flow does not reflect the residual cash balance of the Company for discretionary spending since other items, including debt and dividend payments, are deducted from free cash flow before arriving at the Company's ending cash balance. Management defines free cash flow conversion as free cash flow divided by net income attributable to MSA. There can be no assurances that MSA's definition of free cash flow is consistent with that of other companies. As such, management believes that it is appropriate

to consider cash from operating activities determined on a GAAP basis as well as free cash flow.
