MSA Safety Showcasing the Power of Connected Safety Programs at Connected Worker Summit

PITTSBURGH, November 13, 2023 – Throughout the world, worksite health and safety programs are undergoing an extreme makeover, driven largely by the influence of data and internet connectivity. To highlight how MSA Safety, Inc. (NYSE: MSA), the leader in the development of safety solutions that help to protect people and facility infrastructures, is at the forefront of this evolution, the company will be showcasing its ***Connected Work Platform*** at the Connected Worker Summit in Chicago, Illinois, from November 13th to 15th.

The event pulls together the world's leading companies and experts in the connected work industry for the purpose of gathering and sharing success stories associated with the newest technologies in the connected work ecosystem. Focusing on connecting people, processes, technologies and data, the Connected Worker Summit highlights solutions to help companies drive innovation across their worksites.

MSA Safety is featuring its ***Connected Work Platform***, which is a fully-integrated safety solution that uses data analytics to help safety professionals increase compliance, better manage device fleets and increase visibility into worker safety. This includes automating previously manual tasks and eliminating paperwork to allow for more proactive safety management.

The ***Connected Work Platform*** is powered by MSA's ALTAIR io™ 4 Gas Detection Wearable. Built from the ground up, the device's innovative direct-to-cloud design enables a seamless connection with the MSA Grid cloud-based software and the ALTAIR io Dock. Collectively, the solution delivers real-time visibility of gas detection data to help enhance worker safety. The device works in concert with the company's MSA+ subscription service, and together, the ALTAIR io 4 device and MSA+ create a versatile and powerful hardware/software combination that simplifies safety program management while also enhancing worker safety and productivity.

Summit attendees can speak with MSA's Connected Work Platform experts and learn more about how the platform is helping to enhance worksite safety through connectivity and data. For the event, MSA Safety will be located in the Grand Marquee Ballroom at the Lincolnshire Marriott Resort Hotel. Learn more about MSA's ***Connected Work Platform*** click here.

About MSA Safety

Established in 1914, MSA Safety Incorporated is the global leader in the development, manufacture and supply of safety products and solutions that protect people and facility infrastructures. Many MSA products integrate a combination of electronics, software, mechanical systems and advanced materials to protect users against hazardous or life-threatening situations. The company's comprehensive product line is used by workers around the world in a broad range of markets, including fire service, the oil, gas and petrochemical industry, construction, industrial manufacturing applications, heating, ventilation, air conditioning and refrigeration, utilities, mining and the military. MSA's core products include self-contained breathing apparatus, fixed gas and flame detection systems, portable gas detection instruments, industrial head protection products, firefighter helmets and protective apparel, and fall protection devices. With 2022 revenues of $1.5 billion, MSA employs approximately 5,000 people worldwide. The company is headquartered north of Pittsburgh in Cranberry Township, Pa., and has manufacturing operations in the United States, Europe, Asia and Latin America. With more than 40 international locations, MSA realizes approximately half of its revenue from outside North America. For more information visit MSA's web site at www.MSASafety.com.
